INTEGRATION TESTING SPECIFICATION

This document lists all RESTful endpoints available in the controller layer with guidance for testing interactions.

AssetController

```
**Base Path:** `/api/assets`
```

```
- **GET** \api/assets\
```

- **Method:** `getAllAssets`
- **Params:** ``
- **Returns:** `List<Asset>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **GET** \dipi/assets/category/{category}\
- **Method:** `getAssetsByCategory`
- **Params:** `@PathVariable String category`
- **Returns:** `List<Asset>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **GET** \api/assets/status/\status\\
- **Method:** `getAssetsByStatus`
- **Params:** `@PathVariable String status`
- **Returns:** `List<Asset>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **GET** `/api/assets/search`
- **Method:** `searchAssetsByAssignedTo`
- **Params:** `@RequestParam String keyword`
- **Returns:** `List<Asset>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **GET** `/api/assets/employee/{id}`

```
- **Method:** `getAssetsByEmployeeDbId`
- **Params:** `@PathVariable Long id`
- **Returns:** `List<Asset>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **POST** `/api/assets`
- **Method:** `addAsset`
- **Params:** `@RequestBody Asset asset`
- **Returns:** `Asset`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **PUT** \data api/assets/{id}\
- **Method:** `updateAsset`
- **Params:** `@PathVariable Long id, @RequestBody Asset asset`
- **Returns:** `Asset`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **DELETE** `/api/assets/{id}`
- **Method:** `deleteAsset`
- **Params:** `@PathVariable Long id`
- **Returns:** `void`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
```

AttendanceController

Base Path: \'api/attendance\'

- **GET** `/api/attendance`
 Method: `getAllAttendance`
 Params: ``
- **Returns:** `ResponseEntity<List<AttendanceWithEmployeeDTO>>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}

- **GET** `/api/attendance/employee/{employeeId}`
- **Method:** `getEmployeeAttendance`
- **Params:** `@PathVariable String employeeId`
- **Returns:** `ResponseEntity<List<Attendance>>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **POST** `/api/attendance/mark`
- **Method:** `markAttendance`
- **Params:** `@RequestBody Attendance attendanceRequest`
- **Returns:** `ResponseEntity<Attendance>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}

AuthController

Base Path: \'api/auth\'

API Endpoints:

- **POST** `/api/auth/register`
- **Method:** `register`
- **Params:** `@RequestBody RegisterRequest request`
- **Returns:** `ResponseEntity<AuthResponse>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}

BankDocumentController

Base Path: `/api/bankdocuments`

- **GET** `/api/bankdocuments`
- **Method:** `getAllBankDocuments`

- **Params:** `` - **Returns:** `ResponseEntity<List<BankDocument>>` - **Expected Status:** 200 OK / 4xx / 5xx based on logic - **Sample Request Body:** {...} - **GET** \api/bankdocuments/{id}\ - **Method:** `getBankDocumentById` - **Params:** `@PathVariable Long id` - **Returns:** `ResponseEntity<BankDocument>` - **Expected Status:** 200 OK / 4xx / 5xx based on logic - **Sample Request Body:** {...} - **POST** `/api/bankdocuments` - **Method:** `createBankDocument` - **Params:** `@RequestBody BankDocument bankDocument` - **Returns:** `ResponseEntity<BankDocument>` - **Expected Status:** 200 OK / 4xx / 5xx based on logic - **Sample Request Body:** {...} - **PUT** `/api/bankdocuments/{id}` - **Method:** `updateBankDocument` - **Params:** `@PathVariable Long id, @RequestBody BankDocument bankDocumentDetails` - **Returns:** `ResponseEntity<BankDocument>` - **Expected Status:** 200 OK / 4xx / 5xx based on logic - **Sample Request Body:** {...} - **DELETE** \dipi/bankdocuments/\{id\}\ - **Method:** `deleteBankDocument` - **Params:** `@PathVariable Long id` - **Returns:** `ResponseEntity<Void>` - **Expected Status:** 200 OK / 4xx / 5xx based on logic - **Sample Request Body:** {...}

BillingController

Base Path: \'api/billings\`

```
- **GET** `/api/billings`
- **Method:** `getAllBillings`
- **Params:** ``
- **Returns:** `ResponseEntity<List<Billing>>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **GET** \dillings/\{id\}\
- **Method:** `getBillingById`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<Billing>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **POST** \daga /api/billings \daga \daga -
- **Method:** `createBilling`
- **Params:** `@RequestBody Billing billing`
- **Returns:** `ResponseEntity<Billing>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **PUT** \dapi/billings/{id}\
- **Method:** `updateBilling`
- **Params:** `@PathVariable Long id, @RequestBody Billing billingDetails`
- **Returns:** `ResponseEntity<Billing>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **DELETE** \data{id}\
- **Method:** `deleteBilling`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<Void>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
```

CaDocumentController

Base Path: `/api/cadocuments`

API Endpoints:

```
- **GET** `/api/cadocuments`
- **Method:** `getAllCaDocuments`
- **Params:** ``
- **Returns:** `ResponseEntity<List<CaDocument>>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **GET** `/api/cadocuments/{id}`
- **Method:** `getCaDocumentById`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<CaDocument>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **POST** `/api/cadocuments`
- **Method:** `createCaDocument`
- **Params:** `@RequestBody CaDocument caDocument`
- **Returns:** `ResponseEntity<CaDocument>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **PUT** `/api/cadocuments/{id}`
- **Method:** `updateCaDocument`
- **Params:** `@PathVariable Long id, @RequestBody CaDocument caDocumentDetails`
- **Returns:** `ResponseEntity<CaDocument>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **DELETE** `/api/cadocuments/{id}`
- **Method:** `deleteCaDocument`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<Void>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
```

CommissionsController

- **Sample Request Body:** {...}

Base Path: \'api/commissions\'

API Endpoints:

- **POST** `/api/commissions`
- **Method:** `createCommission`
- **Params:** `@RequestBody CommissionsDTO commissionsDTO`
- **Returns:** `ResponseEntity<CommissionsDTO>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **GET** \api/commissions\
- **Method:** `getAllCommissions`
- **Params:** ``
- **Returns:** `ResponseEntity<List<CommissionsDTO>>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **PUT** \api/commissions/{id}\
- **Method:** `updateCommission`
- **Params:** `@PathVariable Long id, @RequestBody CommissionsDTO commissionsDTO`
- **Returns:** `ResponseEntity<CommissionsDTO>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **DELETE** `/api/commissions/{id}`
- **Method:** `deleteCommission`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<Void>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}

CompanyRegistrationController

Base Path: `/api/companyregistrations`

API Endpoints:

- **GET** `/api/companyregistrations`

```
- **Method:** `getAllCompanyRegistrations`
- **Params:** ``
- **Returns:** `ResponseEntity<List<CompanyRegistration>>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **GET** \api/companyregistrations/{id}\
- **Method:** `getCompanyRegistrationById`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<CompanyRegistration>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **POST** `/api/companyregistrations`
- **Method:** `createCompanyRegistration`
- **Params:** `@RequestBody CompanyRegistration companyRegistration`
- **Returns:** `ResponseEntity<CompanyRegistration>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **PUT** `/api/companyregistrations/{id}`
- **Method:** `updateCompanyRegistration`
- **Params:** `@PathVariable Long id, @RequestBody CompanyRegistration companyRegistrationDetails`
- **Returns:** `ResponseEntity<CompanyRegistration>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **DELETE** \api/companyregistrations/{id}\
- **Method:** `deleteCompanyRegistration`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<Void>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
```

ElectricBillsController

Base Path: `/api/electric-bills`

- **Sample Request Body:** {...}

```
- **POST** `/api/electric-bills`
- **Method:** `createElectricBill`
- **Params:** `@RequestBody ElectricBillsDTO electricBillsDTO`
- **Returns:** `ResponseEntity<ElectricBillsDTO>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **GET** \api/electric-bills\
- **Method:** `getAllElectricBills`
- **Params:** ``
- **Returns:** `ResponseEntity<List<ElectricBillsDTO>>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **PUT** `/api/electric-bills/{id}`
- **Method:** `updateElectricBill`
- **Params:** `@PathVariable Long id, @RequestBody ElectricBillsDTO electricBillsDTO`
- **Returns:** `ResponseEntity<ElectricBillsDTO>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **DELETE** `/api/electric-bills/{id}`
- **Method:** `deleteElectricBill`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<Void>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
EmployeeController
**Base Path:** `/api/employees`
API Endpoints:
- **GET** `/api/employees/{id}") / Handles HTTP GET requests to /api/employees/{id}
```

public ResponseEntity<Employee> getEmployeeById(@PathVariable Long id) {

/ @PathVariable extracts the ID from the URL path

try {

```
Employee employee = employeeService.getEmployeeByld(id);
return new ResponseEntity<>(employee, HttpStatus.OK); / Returns 200 OK status
} catch (NoSuchElementException e) {
return new ResponseEntity<>(HttpStatus.NOT FOUND); / Returns 404 Not Found if employee doesn't exist
}
}
/**
* Endpoint to get an employee by their employee ID (e.g., EMP001).
* @param employeeld The unique employee ID.
* @return ResponseEntity with the employee and HTTP status.
*/
@GetMapping("/byEmployeeId/{employeeId}")
                                                         Handles
                                                                                    GET
                                                                        HTTP
                                                                                               requests
                                                                                                              to
/api/employees/byEmployeeId/{employeeId}
public ResponseEntity<Employee> getEmployeeByEmployeeId(@PathVariable String employeeId) {
try {
Employee employee = employeeService.getEmployeeByEmployeeId(employeeId);
return new ResponseEntity<>(employee, HttpStatus.OK);
} catch (NoSuchElementException e) {
return new ResponseEntity<>(HttpStatus.NOT_FOUND);
}
}
* Endpoint to get all employee records.
* @return ResponseEntity with a list of all employees and HTTP status.
*/
@GetMapping / Handles HTTP GET requests to /api/employees
public ResponseEntity<List<Employee>> getAllEmployees() {
List<Employee> employees = employeeService.getAllEmployees();
return new ResponseEntity<>(employees, HttpStatus.OK);
}
* Endpoint to update an existing employee record.
* @param id The internal ID of the employee to update.
* @param employeeDetails The updated employee details.
* @return ResponseEntity with the updated employee and HTTP status.
*/
@PutMapping("/{id}") / Handles HTTP PUT requests to /api/employees/{id}
        ResponseEntity<Employee>
                                      updateEmployee(@PathVariable
                                                                                     @RequestBody
public
                                                                               id,
                                                                                                       Employee
                                                                        Long
```

```
employeeDetails) {
try {

}
}
/**
* Endpoint to delete an employee record.
* @param id The internal ID of the employee to delete.
* @return ResponseEntity with HTTP status.
*/
@DeleteMapping("/{id}") / Handles HTTP DELETE requests to /api/employees/{id}
public ResponseEntity<HttpStatus> deleteEmployee(@PathVariable Long id) {
try {
employeeService.deleteEmployee(id);
return new ResponseEntity<>(HttpStatus.NO_CONTENT); / Returns 204 No Content (successful deletion)
} catch (NoSuchElementException e) {
return new ResponseEntity<>(HttpStatus.NOT_FOUND); / Returns 404 Not Found
}
}
* Endpoint to update an employee's status.
* @param id The internal ID of the employee to update.
* @param status The new status for the employee.
* @return ResponseEntity with the updated employee and HTTP status.
*/
@PutMapping("/{id}/status") / Handles HTTP PUT requests to /api/employees/{id}/status
public ResponseEntity<Employee> updateEmployeeStatus(@PathVariable Long id, @RequestParam String status) {
try {
Employee updatedEmployee = employeeService.updateEmployeeStatus(id, status);
return new ResponseEntity<>(updatedEmployee, HttpStatus.OK);
} catch (NoSuchElementException e) {
return new ResponseEntity<>(HttpStatus.NOT_FOUND);
}
}
@PostMapping("/login")
```

```
public ResponseEntity<?> login(@RequestBody Map<String, String> loginData) {
String email = loginData.get("email");
String password = loginData.get("password");
Optional<Employee> employeeOpt = employeeService.getAllEmployees().stream()
.filter(emp -> emp.getEmail().equals(email) && emp.getPassword().equals(password))
.findFirst();
if (employeeOpt.isPresent()) {
return ResponseEntity.ok(employeeOpt.get());
} else {
return ResponseEntity.status(HttpStatus.UNAUTHORIZED).body("Invalid email or password");
}
}
/**
* Endpoint to register a new employee account.
* Accepts employeeName, employeeId, email, password, phoneNumber, and roles (as ["EMPLOYEE"]).
* Uses the first role in the list for the Employee entity.
* @param request The registration request DTO.
* @return ResponseEntity with the created employee and HTTP status.
*/
@PostMapping("/register`
- **Method:** `registerEmployee`
- **Params:** `@RequestBody com.example.storemanagementbackend.dto.RegisterRequest request`
- **Returns:** `ResponseEntity<Employee>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **POST** `/api/employees/hr/register`
- **Method:** `hrRegisterEmployee`
- **Params:** `@RequestBody EmployeeRegistrationRequest request`
- **Returns:** `ResponseEntity<Employee>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
```

EmployeeDocumentController

```
**Base Path:** `/api/hr`
```

- **GET** `/api/hr/documents`
- **Method:** `getAllDocuments`
- **Params:** ``
- **Returns:** `ResponseEntity<List<EmployeeDocumentDTO>>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body: ** N/A
- **GET** \api/hr/documents/employee/{employeeld}\
- **Method:** `getDocumentsByEmployeeId`
- **Params:** `@PathVariable String employeeld`
- **Returns:** `ResponseEntity<List<EmployeeDocumentDTO>>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** N/A
- **GET** `/api/hr/documents/type/{documentType}`
- **Method:** `getDocumentsByType`
- **Params:** `@PathVariable String documentType`
- **Returns:** `ResponseEntity<List<EmployeeDocumentDTO>>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** N/A
- **GET** `/api/hr/documents/{id}`
- **Method:** `getDocumentById`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<EmployeeDocumentDTO>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** N/A
- **POST** `/api/hr/upload/{docType}/{employeeId}`
- **Method:** `uploadDocument`
- **Params:** `@PathVariable String docType, @PathVariable String employeeId, @RequestParam("file") MultipartFile file`
- **Returns:** `ResponseEntity<EmployeeDocumentDTO>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body: ** N/A
- **GET** `/api/hr/download/{employeeId}/{docType}`
- **Method:** `downloadDocument`
- **Params:** `@PathVariable String employeeId, @PathVariable String docType, HttpServletRequest request`
- **Returns:** `ResponseEntity<Resource>`

- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** N/A
- **DELETE** \api/hr/documents/{id}\
- **Method:** `deleteDocument`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<HttpStatus>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** N/A

ExpoAdvertisementController

Base Path: `/api/expo-advertisements`

- **POST** `/api/expo-advertisements`
- **Method:** `createExpoAdvertisement`
- **Params:** `@RequestBody ExpoAdvertisementDTO expoAdvertisementDTO`
- **Returns:** `ResponseEntity<ExpoAdvertisementDTO>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **GET** `/api/expo-advertisements`
- **Method:** `getAllExpoAdvertisements`
- **Params:** ``
- **Returns:** `ResponseEntity<List<ExpoAdvertisementDTO>>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **PUT** `/api/expo-advertisements/{id}`
- **Method:** `updateExpoAdvertisement`
- **Params:** `@PathVariable Long id, @RequestBody ExpoAdvertisementDTO expoAdvertisementDTO`
- **Returns:** `ResponseEntity<ExpoAdvertisementDTO>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **DELETE** `/api/expo-advertisements/{id}`
- **Method:** `deleteExpoAdvertisement`

- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<Void>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}

FinanceReportController

Base Path: `/api/financereports`

- **GET** \api/financereports\
- **Method:** `getAllFinanceReports`
- **Params:** ``
- **Returns:** `ResponseEntity<List<FinanceReport>>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **GET** `/api/financereports/{id}`
- **Method:** `getFinanceReportById`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<FinanceReport>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **POST** `/api/financereports`
- **Method:** `createFinanceReport`
- **Params:** `@RequestBody FinanceReport financeReport`
- **Returns:** `ResponseEntity<FinanceReport>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **PUT** \dipi/financereports/{id}\
- **Method:** `updateFinanceReport`
- **Params:** `@PathVariable Long id, @RequestBody FinanceReport financeReportDetails`
- **Returns:** `ResponseEntity<FinanceReport>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}

- **DELETE** \delta /api/financereports/{id}\
- **Method:** `deleteFinanceReport`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<Void>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}

FixedStationaryController

Base Path: `/store/stationary/fixed`

- **GET** `/store/stationary/fixed`
- **Method:** `getAll`
- **Params:** ``
- **Returns:** `List<FixedStationary>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **GET** `/store/stationary/fixed/{id}`
- **Method:** `getById`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<FixedStationary>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **POST** `/store/stationary/fixed`
- **Method:** `create`
- **Params:** `@RequestBody FixedStationary stationary`
- **Returns:** `FixedStationary`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **PUT** `/store/stationary/fixed/{id}`
- **Method:** `update`
- **Params:** `@PathVariable Long id, @RequestBody FixedStationary stationary`
- **Returns:** `ResponseEntity<FixedStationary>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic

```
- **Sample Request Body:** {...}
- **DELETE** `/store/stationary/fixed/{id}`
- **Method:** `delete`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<Void>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
FurnitureController
**Base Path:** `/store/assets/furniture`
API Endpoints:
- **GET** `/store/assets/furniture`
- **Method:** `getAll`
- **Params:** ``
- **Returns:** `List<Furniture>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **GET** `/store/assets/furniture/{id}`
- **Method:** `getById`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<Furniture>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **POST** `/store/assets/furniture`
- **Method:** `create`
- **Params:** `@RequestBody Furniture furniture`
- **Returns:** `Furniture`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **PUT** `/store/assets/furniture/{id}`
- **Method:** `update`
```

- **Params:** `@PathVariable Long id, @RequestBody Furniture furniture`

```
- **Returns:** `ResponseEntity<Furniture>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **DELETE** `/store/assets/furniture/{id}`
- **Method:** `delete`
- **Params:** `@PathVariable Long id`
- **Returns:** `ResponseEntity<Void>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
```

IncentivesController

```
**Base Path:** `/api/incentives`
```

- **POST** `/api/incentives` - **Method:** `createIncentive` - **Params:** `@RequestBody IncentivesDTO incentivesDTO` - **Returns:** `ResponseEntity<IncentivesDTO>` - **Expected Status:** 200 OK / 4xx / 5xx based on logic - **Sample Request Body:** {...} - **GET** `/api/incentives` - **Method:** `getAllIncentives` - **Params:** `` - **Returns:** `ResponseEntity<List<IncentivesDTO>>` - **Expected Status:** 200 OK / 4xx / 5xx based on logic - **Sample Request Body:** {...} - **PUT** \dipi/incentives/{id}\
- **Method:** `updateIncentive`
- **Params:** `@PathVariable Long id, @RequestBody IncentivesDTO incentivesDTO`
- **Returns:** `ResponseEntity<IncentivesDTO>`
- **Expected Status:** 200 OK / 4xx / 5xx based on logic
- **Sample Request Body:** {...}
- **DELETE** \dapi/incentives/{id}\

```
- **Method:** `deleteIncentive`
```
