Employee Name: Swathi

Work Report of Project

- Created modern, responsive dashboards for Store, HR, Data Management, Finance, and Employee pages using HTML, CSS, and JavaScript frameworks.

- Designed and implemented an Admin dashboard layout with sections for Store, Data Management, and Finance; remaining modules are in progress.

- Built reusable UI components (cards, tables, forms, charts) to maintain consistency across all pages.

- Applied responsive design techniques to ensure compatibility across devices (desktop, tablet, mobile).

- Used external UI libraries (e.g., Tailwind) for faster and clean UI development.

- Added client-side validations to forms for improved user experience and error prevention.

- Implemented tab navigation, collapsible sidebars, and dropdowns for better user interaction.

- Ensured smooth user experience with loading indicators and hover effects.

- Organized code into modular, maintainable folder structures.

- Followed UI/UX best practices to improve visual hierarchy and accessibility.
